Interim Director of Curriculum & Instruction

# Elmont Union Free School District

## *Cultivating Scholars and Global Citizens*

- ▶ 2024-2025 Education Goal #1:
- ▶ Student Outcomes: Improve the performance of all students in reading, math, and science, through high quality curriculum resources, instruction, and strengthening the social/emotional and behavioral support for all students.

# From Data to Action Elementary Curriculum

## ► 1. Familiarization with Computer-Based Testing (CBT)

**Goal:** Ensure students are comfortable with the online testing environment.

**Action:** Use CBT platforms for weekly practice quizzes in Math and ELA to familiarize students with digital tools and navigation.

## ► 2. Keyboarding & Digital Literacy

**Goal:** Strengthen typing and digital navigation skills in Grades 3-6.

**Action:** Integrate keyboarding exercises and navigation practice during school or through at-home tutorials.

## ► 3. Test-Taking Strategies

**Goal:** Develop students' ability to navigate questions, manage time, and use online tools effectively.

**Action:** Teach skills like highlighting, drag-and-drop, and efficient use of scratch paper.

## ► 4. Staff Training

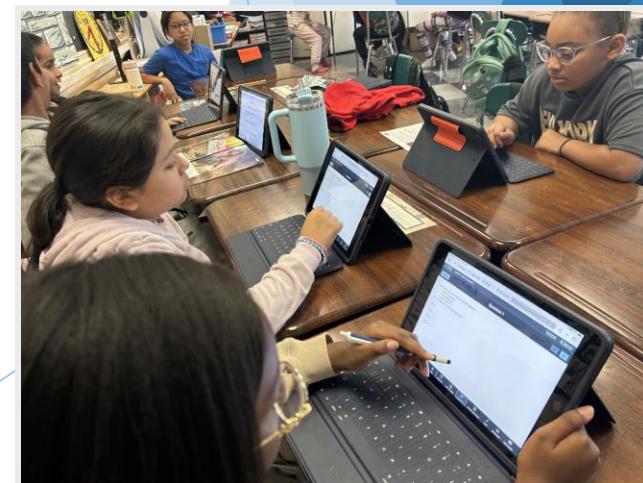

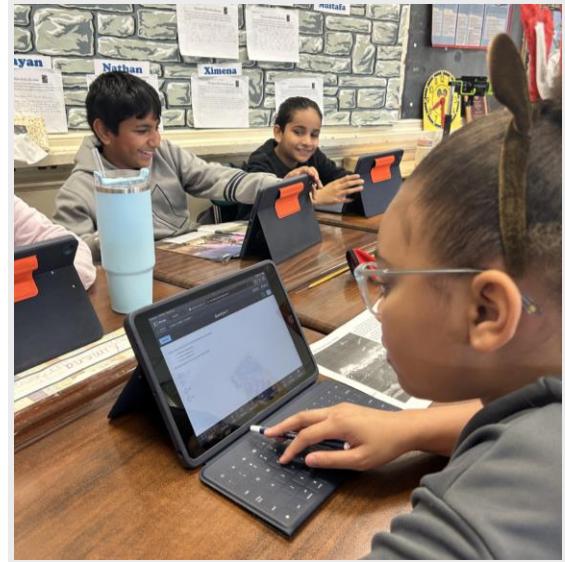

**Goal:** Prepare teachers to support students in CBT readiness.

**Action:** Offer professional development on CBT administration, data analysis, and integrating digital tools into daily instruction.

## ► 5. Access to Technology

**Goal:** Ensure all students have equitable access to essential tools.

**Action:** Provide Grades 3-6 students with stylus pens for precise practice, boosting confidence and performance in CBT environments.

# From Data to Action Elementary Curriculum

## CBT Preparation Strategies

- A comprehensive Step-By-Step Guide for Teachers and Students was developed by Elmont's Curriculum Writing Team during the summer to support CBT readiness.
- Grades 4-6 Mock ELA and Math Assessments are being designed and administered digitally to mirror the CBT experience.
- Daily Do Now's are incorporating Computer-Based Testing sampler questions across Math, ELA, and Science to build familiarity with the platform.
- Teacher Intervisitations are fostering collaboration to enhance the integration of CBT strategies into daily classroom instruction.
- Professional Development sessions have focused on embedding CBT strategies into instruction, delivered during Superintendent's Conference Day and Wednesday faculty meetings.
- A five-week, 10-session ELA/Math PM Tutorial program will be offered in February/March for students in grades 3-6. This program will focus on enhancing students' familiarity with the computer-based testing tools and developing strategies for answering questions on the Nextera platform for students in grades 4-6.
- In January, students in grades 4-6 will participate in the state-mandated Computer-Based Testing Simulation. This will provide an opportunity for them to practice using the Nextera platform, focusing on assessments in ELA, Mathematics, and Science (for grade 5 students). The simulation is designed to familiarize students with the online testing format and help them feel more confident during the official state assessments.

# From Data to Action

- Explore New Science Curriculum Adoption for Grades K-6: Initiate the process of selecting a comprehensive, research-based science curriculum to align with current educational standards and best practices. This initiative aims to enhance student engagement, foster critical thinking, and provide hands-on learning opportunities in science across all elementary grade levels.
- Creation of New Hands-On Science Labs for Grades 3-5 were designed over the summer: Developed engaging, interactive science labs designed to immerse students in experiential learning. These labs emphasize critical thinking, inquiry-based exploration, and a deeper understanding of fundamental scientific concepts, fostering curiosity and a passion for science.
- As a result of our data analysis, IXL Science was added to our existing IXL programs to further support differentiated instruction in science. This addition allows teachers to offer personalized practice aligned with curriculum goals while reinforcing key concepts and skills across disciplines. The integration of IXL Science also enhances cross-curricular learning, connecting science with literacy and math, and provides students with engaging, standards-based content that aligns with our instructional priorities.
- Explore New ENL Curriculum Materials: Begin the process of selecting a comprehensive, research-based ENL curriculum that aligns with current educational standards and best practices. This initiative aims to support language acquisition, enhance student engagement, and provide targeted strategies to meet the diverse needs of English language learners across all elementary grade levels.
- Professional development sessions were held during Superintendent's Conference Day for staff working with students with disabilities. These sessions focused on introducing new instructional resources, including SPIRE and Touch Math, to enhance teaching strategies and support individualized student needs.

# From Data to Action

- Professional development provided by Elmont's instructional coaches on writing instruction and small group math instruction.
- Expanding Fountas & Pinnell Mini Lessons: Continue implementing Fountas & Pinnell (F&P) Reading and Writing Mini Lessons in Grades 5 and 6 to enhance student literacy skills. These lessons offer focused, explicit instruction on specific writing strategies, helping students develop strong and effective writing habits. To support this initiative, professional development on small group literacy activities, including F&P Mini Lessons, was provided during Superintendent's Conference Day.
- Expanding Small Group Math Workshops: Implemented in grades K-3 to provide differentiated, targeted instruction that builds foundational math skills and fosters engagement through hands-on activities. Teachers received professional development on this model during Superintendent's Conference Day to enhance its integration into daily instruction.

## **Targeted Building Support**

- Vertical Articulation meetings are strengthening content alignment and skill development across grade levels.
- Data Analysis Using Instructional Data Warehouse Reports (Gap Reports) are driving targeted interventions and addressing student needs. Building leadership teams are using building specific data to focus on individual subgroups within their buildings.
- Small Group Instruction is being employed to deliver personalized, skill-focused support.
- The Child Study Team is setting measurable goals for students, revisiting and adjusting these goals every six weeks.

Grade-Level Team Meetings with Administrators ensure data-driven decision-making and the identification of specific instructional focus areas.

Morning Tutorial Programs are addressing targeted learning goals derived from data analysis.

Pre-K – Grade 2 - Universal Screeners are being used throughout the grade-levels to identify specific focus skills and target areas of improvement within small group instruction and morning tutorial programs.

Thank you!
